Monday.

Ward. Feb. 13. 1854.

Mal presentations. In face presentations we have the cheek or malar bone. The face is often so much swollen often as to be very difficult to distinguish, but the bridge of the nose will distinguish the presentation. Breech often more frequently than any of the complex presentations or preternatural labors. How to distinguish it, ^{the best} among the indications diagnosticating the presentation is the discharge of meconium. Six positions of the breech support the perineum. Worst form of presentation the pains stop. Chord generally presents where there is a large quantity of water & by a sudden discharge it presents.

Humphreys.

Gastritis. is not of very frequent occurrence. Symptoms. violent burning pain in epigastrium, dyspnea, & contact or motion greatly affected, violent heat, thirst, & vomiting of acid

last. region of the stomach swelling epigastrium
throws off cover. stools & urine suppressed.
death sets in from singultus delirium. subsult
tendit in this form generally from poisoned
milder form. pain in epigastrium passes
knowing, passing up to hypochondria
into shoulders back. after vomiting or after
eating there is an exacerbation of the symptoms
last face & hands red which continues until
the difficult digestion is done with
pyrosis eructation vomiting. which
may be mucous green coffee grounds or
pure blood these vomiting are very
annoying. fever synochal or erythimial
usually or may be wanting. Disease
generally commences with a chill bowels
constipated. Symptomatic symptoms.
headache. pain in limbs cramps or as
Schaeffer says father cough, emaciation
slight fever. may be denominated Chronic

Often only a single symptoms only indicates the
presence of the disease, & after perforation of the
stomach sets in with the first indications
Symptoms are all worse during digestion
vomiting may be absent, or may only set in
during the latter stages.

Termination In the first form death may
soon terminate the disease may terminate in
chronic which may last a long time
or may terminate in alteration of the stomach
Causes are numerous, traumatic, or from
weakness from previous disease, ice or cold drink
when the body is overheated, from suppressed
eruption, dyscrasia &c

Prognosis more rapid more dangerous.
the subacute form less dangerous, when the
fluid taken into stomach are retained, equal
temperature favorable.

Treatment must be reference to the Cause
metastatic poison & must therefore be.

Acn synchal per. pain from ice drink. & d
hrs violent excruc. from ice. sudden motion
Hypococh counter burning pain. anguish. & d
And erud. From deep stomach fever
must yield to tongue.

Bel cerebral symptom. delirium
Hypas preferable.

increased secretions &c. without pain

CHAPTER I
THE FOUNDING OF THE NATION

The first chapter of the history of the United States of America is the story of the founding of the nation. It begins with the arrival of the first European settlers in the early 17th century. These settlers, who came from England, France, and the Netherlands, established small colonies along the eastern coast of North America. They were attracted to the land by the promise of a better life, a place where they could practice their own religion and govern themselves.

As the colonies grew, the settlers began to develop a sense of identity and a desire for self-government. They elected their own representatives to local assemblies and demanded that the British government respect their rights. The British, however, were determined to maintain control over the colonies and to ensure that they remained loyal to the crown. This led to a series of conflicts between the colonies and the British, culminating in the American Revolution of 1775-1783.

The American Revolution was a turning point in the history of the United States. It resulted in the colonies gaining their independence from Britain and the establishment of a new nation. The new nation was founded on the principles of liberty, justice, and equality. It was a nation that was born out of a struggle for freedom and self-determination. The story of the founding of the United States is a story of courage, sacrifice, and the pursuit of a better life.

A termination in suppression, irregular
Naroxen in gener typhoid symptoms
Gangra seldom. typhoid & putrid Symp.
Pyelitis or of the mucous membrane
generally from renal calculi. hematuria
nephritis & discharge of calculi. In
double the secretion suppressed.

Urea may find its way into the ureters or
in the duodenum. stomach or to the lungs.

Diagnosis. with nephritic colic. is more
faltering, riding, &c. colic not inflammatory but
not continuous faintly. termination discharge
of renal calculi. testicle violently drawn
up urine not so constantly suppressed.

Lumbago. pain in both lumbar region
inconstant & wander & rheumatic character
of the pain. no feeling of tension in the
thigh no vomiting. psoriasis sacrum
bent towards diseased side. abdomen
& rotating the sides especially painful.

inguinal swelled, oedema lower extremities,
Inflammation of spinal cords, paralysis of spinal
cord unable to raise body upright;

Catarrh of bladder very difficult to
character of urine not known until the disease
is neglected. strong Urine. with
introduction of the catheter will indicate the
seat of the difficulty.

Cause. adults, rarely children the
from calculi. drink of beer tea malice
cause. shock concussion cold and
irritating substances such as cantharides
calculi stone. Entozoa often found
in kidneys. secondary effects. Arthritis
which latter has a peculiar character
Prognosis. generally favorable,
when ulcer has taken place (more
unfavorable degeneration of the taken
place

paroxysms, emission of urine scanty few
constipation, pain not able to sleep
like stinging burning, pains towards the
bladder & sides, pains.

hep sulph sudden amount of yerd.

Puls in females, temperance & arrangement
height & extent disorganization

Nux men from piles or from spiritus-
burning in lumbar region

Onobis menal to pubis/pain large
apis men cati thyj. &c.

old long standing ulcerations lyc, sk
puls & zinc also nit acid

Diabetes, discharging large quantities
of urine consisting of sugar, mostly in
aged persons, obscure symptoms of
dyspepsia, mastication slow, sluggish stools
may continue for months & years, urine
pass more frequent large quantities
patient must get up at night or

urinary smell vanishes. sweet taste. pates
becomes exhausted. Thirst obliges him to
drink all the time. Exhaust continues
stools change in character. 6, 8, 10, or even
20 lbs discharged per day. emaciations
continue edema & dropsy may terminate
the scene.

Treatment. Phasa yellow urine contain
sugar. Mad constipation. profuse urine
other slow decomposition of the meat.

Plantago Major profuse discharge of
urine straw color slow stool. bleeding
of the gums &c.

Nephralgia calculi formed into the kidney
phases of lime. benzoic of lime. the uric
calc. when phases of lime round. smooth
if small little pain when large crop
benzoic of lime gives rise most intense
pain & calc. ham t. keeps a long course
more from shock jolt or exertion.

The first of these is the fact that the United States is a young nation, and that its history is a history of growth and development. The second is the fact that the United States is a nation of immigrants, and that its history is a history of the struggle for a better life. The third is the fact that the United States is a nation of free men and women, and that its history is a history of the struggle for freedom and justice.

The fourth is the fact that the United States is a nation of peace-loving people, and that its history is a history of the struggle for peace and harmony. The fifth is the fact that the United States is a nation of progress, and that its history is a history of the struggle for progress and improvement. The sixth is the fact that the United States is a nation of hope, and that its history is a history of the struggle for hope and optimism.

The seventh is the fact that the United States is a nation of love, and that its history is a history of the struggle for love and compassion. The eighth is the fact that the United States is a nation of faith, and that its history is a history of the struggle for faith and belief. The ninth is the fact that the United States is a nation of courage, and that its history is a history of the struggle for courage and bravery.

The tenth is the fact that the United States is a nation of justice, and that its history is a history of the struggle for justice and fairness. The eleventh is the fact that the United States is a nation of truth, and that its history is a history of the struggle for truth and honesty. The twelfth is the fact that the United States is a nation of wisdom, and that its history is a history of the struggle for wisdom and knowledge.

ign & nut also.

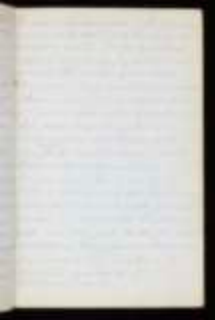

HUMPHREYS.

Helminthiasis. Entozoa or Worms.
From different species. Acarus or
lumbica. ^{small intestine} similar to common earth worm
Description unnecessary. Oxarius —
or ascanides. males $\frac{1}{2}$ long females $\frac{3}{4}$ long
inhabit the large intestines & rectum
Tricocephalus tenuis thin $\frac{2}{3}$ thick $\frac{1}{3}$ & the
latter raised up spiral form white color
Colon in neighborhood of appendix ecc.
Most common parasites. day fox & mangle
Tenia solium, tapeworm. more
formidabile. long flat jointed or foramin.
on each joint containing eggs, on every other
side. So long as the head remains the in-
crease of its length & propagation given to

The most indubitable evidence of the presence of worms is the discharge of them from the alimentary canal. Worm diathesis
buffy pale face deeply distended abdomen
extremities thin & cold quick pulse
blueness around eyes leucophlegmatic disposition
petulencies in the alimentary tract. scrupulous diet
food is chased, weak digestion elaboration of
chyle deficient. salivation leucorrhoea
stools irregular. white tongue. frothy
slimy ^{mucous} stools. considered as worm nests.
Symptoms from mechanical irritation.

Wandering crawling burning or emptiness &
maturation in the abdomen perhaps this is tenia
most violent when fasting. Salty food milk
or sweetening food soon relieves Restless sleep
picking nose itching anus, twitching dry skin
convulsions. Worm fever most common
form, worse at night irregular in its
character. much diminished at resting and
hour, much increased.

Depressed appetite. During full Moon
& change during the Moon

Terminations rarely favor May cause
emaciation. sweat dejection & D

Treatment, first put the ^{patient} on a regimen
suitable to the disease. Meats, & such
substantial. Salt food. (pies candies or
pastries are to be done away with Meats

Cina dumbicidis. low —

Acon for the storm fever.

Merc. also.

In order to prevent a return.

Calc & Sil. Calc enlarges abdomen
retarding & irregular habit. sil moon change

Chin Ascarides Pgr & Lern
most beneficial. Chin if given cause
a diarrhea. Pteron during fever
Hys convulsions. Stram. (may
also be in doubt)

Sinia remedy given in accordance

to the diathesis & disposition of the patient
Felix mas given low, 1 or 3 attenuations
one or two weeks, then give an antipsonic
according to the indications present

(The case of irregular coating of the tongue
probably a case of stomacae & flatulens,
anbuld. be the best remedy indicated.)

24 hours. pulse quick, thirst ery. stomach
distended. pain. repeated vomiting. frequent
discharges of water. respiration oppressed.
skin cool. cough & scream become a plaintive
whimper. old expression of countenance
convulsion may second & 3rd seen
legs acute from 6 or 8 days. vomiting
& incontinence. feces or mucus break out
stools grayish with flecks remainder
of the face, neck & face, wrinkled
child lies in a stupor condition
but easily aroused
3rd Day. In thirst, cough, emaciation
and this slow but sure.

Vomiting one of the most constant
symptoms excited by anything taken
into the stomach, & ceases only shortly
before death. faint & exhausted after
vomiting, white frothy threads eject
& the vomit appears no relief.

Diarrhoea long before disease sets in &
never wanting, acid, dirty Clay green
and intestinal mucous, little disch-
at once prostration worse from any stool
solid flatulency. Tenderness & inflation
of the stomach less present than any of the
other symptoms. Collapse never
wanting, & stands in no relation to the
evacuation, face red at first, expired air
is cold. Fever at first asthenic.
character ^{mild} sinks in the progress but, ap-
petite wanting thirst great, & is in no
comparison to the progress of disease
& the drink is thrown up. Cough is present
when the disease advances more slowly
sympathetic affection of nervous system
cant look at the child but what it
cries. No bony head to in pillow to
grasp the head to twilly no serious
diagnosis is from hydrocephalus.

Causes, meaning. & after to 1 at the breast
Improper diet. also the sympathy
affection of the stomach in consequence of
teething: epidemic endemic. &c.
Late in spring & summer. Softening of
the brain has been found in post mortem
examination of this disease

Diagnosis.

Prognosis. Not unfavorable in majority
of cases.

Treatment. much to be done in meaning
which should not be done suddenly, & should
not be weaned in summer time. Milk
fresh from cows given while yet warm

Find out what the child can eat.

acon big calc ac & tart emel. must
inspect. acon like Hydro fever
note, count quick pulse stupor.

Calc acetatum scrupulous diathesis. long
symptom detail. green gray stool.

THE HISTORY OF THE
CITY OF BOSTON

From its first settlement in 1630 to the present time
The city of Boston was founded by a group of Puritan
settlers who came to the New World seeking religious
freedom and a better life. The city grew rapidly and
became one of the most important ports in the
colonies. It was the site of many important events
in American history, including the Boston Tea Party
and the Battle of Boston. The city has a rich
cultural heritage and is known for its many
landmarks and historic sites. Today, Boston is a
major center of commerce and industry, and
one of the most vibrant cities in the United States.

Rheumatic affections especially in the knee.
Lobelia cardinalis greenish tinctoria

Does grow in corn fields perhaps the inflated seeds
seeds & leaves used gather whole plant
Asomatic affections. perspiration. tingling of
the extremities. Patient hungry after eating
Lupulus humulus. (common hop). female
buds containing pollen and G. reddish brown
tinct. Vertigo & stupor in the head.
slow pulse. coffee best antidote

Manganum. (manganese) oxide of manganese
grey color. should be prepared by trit.

Din of Stem

Mineanthus trifoliata. (buck bean)

grows in Europe & America. leaves
gather in autumn prepare time dry plant.
Chifetis. pale cast or shank.

Mercurialis perennis (daps mercury?)

small plant. diuretic & emollient
tis flow. head eggs. chryse

Millefolium achilles (yarrow)

uterine hemorrhage no ulceration of the uterus.

Maschus. musk. (animal product)

heras females hysteria. cholera, eyes out of nose symptoms

Nickleum. (carbonate of nickel) trit.

Nux maschatus (nutmeg) small tree 20 or 30 feet
chose the smaller nuts. pulverize & strait
article contains an essential oil,

nervous. affections gastric affections
limb on being laid on feels numb. from wet

Oleander. & leaves, dark green tint.

Oleum jecoris maris. (cod liver oil)

yellow light color.

Paris gulifolia (redish yellow tincture),

Petroleum. (rock oil) from by Hak
sick headaches, with flicking beneath
eyes. the appearance of heat, pyrosis

The first part of the book is devoted to a general history of the United States from the discovery of the continent to the present time. It is divided into three main parts: the first part covers the period from the discovery of the continent to the establishment of the first colonies; the second part covers the period from the establishment of the first colonies to the Revolution; and the third part covers the period from the Revolution to the present time.

The second part of the book is devoted to a detailed history of the United States from the Revolution to the present time. It is divided into three main parts: the first part covers the period from the Revolution to the establishment of the Constitution; the second part covers the period from the establishment of the Constitution to the Civil War; and the third part covers the period from the Civil War to the present time.

The third part of the book is devoted to a detailed history of the United States from the Civil War to the present time. It is divided into three main parts: the first part covers the period from the Civil War to the Reconstruction; the second part covers the period from the Reconstruction to the present time; and the third part covers the period from the present time to the future.

Autocratic - independent

Male

Naïve - naive simplicity

Allegation - exculpation, excuse

Apocryphal (advent) by the way

Whistle

Brasserie

Butterfly

Boyle

Gravel - stony, cracks,

Spiked - a stool with three feet

Patent, open, public

Constrative - tending to strengthen

Curiously - in a curious) haughty manner

Caustic - as evidenced from a phosphorus

Flaccid - congelation,

Genetic

Cardiac - a chemist

Cynical - surely mocking

Stentative - trying

Andromed - Lyphens once in four years

1871
The first of the year
was a very dry one
and the crops were
very poor.

The second of the year
was a very wet one
and the crops were
very good.

The third of the year
was a very dry one

Utricul - a little bag

Utricular - containing little bags or bladder

Culminate - to be in the median

Orthodox - correct in doctrine

Dysophantia - venially plating

Devile - blank, stringing

Delirio - doubtful - uncertain

Cartle - to separate - to sift out

Docien - a hall for giving of an

Isopodical - uncorrected - uncorrected

Dispositions - done by death

Palpable - that may be felt, grope

Amity, greenish, agreement

Recluse - living in retirement

Procurator

Domine

Myth

Andish

Bean Mead - Franco

Steakily - roughness, downy

Neoter

Demora - obstruction, impediment, hindrance

Deacertis - the question of right - drops

Probationes - one upon trial

Proem, a preface; introduction

Proemial - introductory

Provocation that excites anger

Pro. - the hog

Adversus - an imaginary sound in the ear

Dyspnoea - *emotional asthma* & *paroxysmal dyspnoea* *asthmatic*

Finale last note in music, termination

Finances - revenue - income

Financiel - pertaining to finances

Reputat - the degree of respect

Reprehensio - clear, plain

Effluvia - the mind, the soul, intellect

Thiade - a strain of declamation

Pedant - one who displays his learning

Demut - rank boldness

Demut - counter - jerky

Ullitatan - consisting in utility

Utopian ideas, chimerical

The first part of the paper is devoted to a general
 discussion of the problem. It is shown that the
 problem is of great importance in the theory of
 functions of a complex variable. The second part
 contains a detailed proof of the theorem. The third
 part is devoted to some applications of the theorem.
 The fourth part contains some remarks and
 references.

Given a rule government

Heur - a friend, get so.

The capon

Flotation - the action or influence of bubbles

Omaga - part in the shoulder

all things appear of a red color

Omaga - a dream of the eye in which
I have in giving a number of questions (perhaps)
to me many years ago

There is such a made

That is it was for the act

That is clear

That on the flotation by weight? return?

That the composition of water

That is the composition of water, air

Example

That reminds you of language clear?

How many kinds of clear

How would you counteract the formation

That is hard? really?

How do simple acids around power of

That do you understand by a number

How would you distinguish between two

1872-1873

1874-1875

1876-1877

1878-1879

1880-1881

1882-1883

1884-1885

1886-1887

What are some of the signs of pregnancy?

What is the amount of discharge in one period of menstruation?

How long does it continue?

How long does the Lochia continue?

How does the lochia differ from an adult?

What is the cause of the lochia being so large?

And of the leucor?

When is the blood returned from lungs?

Through what vessels is the blood carried & returned?

When does the secretion of milk take place?

Female.

What is the use of the clitoris?

Does the female have a clitoris?

Does it vary?

What animals have a clitoris?

Does a bear?

Bookley

What do you understand by a proctum?

What is a compound proctum?

What is a simple proctum?

How is disease produced?
What is its origin?
What is its color?

How is it produced?

What is its mechanism?

Where is it obtained?

What is its character of body?

Where is it obtained?

Where is it obtained?

Humours

What diseases have you when you're young?

In what manner do the humours complain?

How does dysentery terminate in death?

What are some of the remedies indicated?

When would you give calomel?

When would you give opium?

Have you any specific fears when you are young?

Have you any intermitting fevers?

W. A. L. d.

If you were asked to a case of labor how would you know the patient was pregnant?

1870

1871

1872

How many holy arches?
How are they garned?

What is the number?

How is it garned?

What prevents you from entering the gate?
Williamson

Which are you the best at anal. mind or drawing portrait?
What is this. (showing one a piece of vac fac)

How is it prepared?

What is a trineur?

How would you prepare a neur?

How did that prepare it?

Through what agency is London prepared
What impurities contained in alcohol

How would you remove the impurities oil?

What the composition of ammoniacal air

What the composition of water

What is the lowest water?

What is this?

What is garned when phos burnes?

Page 100
The first part of the book is devoted to a general introduction to the subject of the history of the English language. It discusses the various factors which have influenced the development of the language, and the changes which have taken place in its vocabulary, grammar, and pronunciation.

The second part of the book is devoted to a detailed study of the history of the English language from the time of its first appearance in the British Isles to the present day. It discusses the various dialects which have developed, and the changes which have taken place in the language over the centuries.

The third part of the book is devoted to a study of the history of the English language in the United States. It discusses the various influences which have shaped the American English, and the changes which have taken place in the language since it was first brought to the New World.

The fourth part of the book is devoted to a study of the history of the English language in the Indian subcontinent. It discusses the various influences which have shaped the Indian English, and the changes which have taken place in the language since it was first brought to the East.

The fifth part of the book is devoted to a study of the history of the English language in the Far East. It discusses the various influences which have shaped the Far Eastern English, and the changes which have taken place in the language since it was first brought to the East.

The sixth part of the book is devoted to a study of the history of the English language in the Pacific. It discusses the various influences which have shaped the Pacific English, and the changes which have taken place in the language since it was first brought to the Pacific.
